

PROTEC

Complete extruded feed for fish.

Chemical Analysis

Composition %	M	L	T	1 Period	2 Period	3 Period
Crude Protein	56.0	54.0	51.0	48.0	46.0	44.0
Crude Fat and Oils	15.0	15.0	15.0	16.0	18.0	20.0
Crude Fibre	1.3	1.0	1.5	3.0	3.0	3.0
Crude Ash	10.0	9.5	8.0	7.0	6.5	7.0
Phosphorus	1.3	1.5	1.2	1.1	1.1	1.0
Digestible Energy (MJ/kg)	17.9	17.8	17.8	16.7	17.3	17.5

Ingredients:

Refer to the label.

Packaging

Protec is available in bigbag (600kg) and bag (25kg).

Directions for use

Protec is Skretting's prime functional feed for farmed fish. New Protec helps to shield skin, gut and gills; it supports the immune system, provides building blocks for new cells and optimizes the balance between fish, microbes and environment.

Skretting Active Nutrition recommends Protec for at least 4 weeks in connection to vaccination and to prepare fish to face stressful events, either related to management (stocking, handling, grading, transfer...) or to environment (sub-optimal conditions, seasonal changes...). Contact Skretting Technical Service for a detailed protocol tailored to your specific situation.

Suggestions for daily feed allowance (as % biomass)

Feed at 1-2% according to water temperature and fish size.
